#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 62190, Certificate 15006 is issued subject to the terms and conditions imposed in said Permit 62190, Certificate 15006 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 74517, 75294 and 75295, having the same place of use, shall not exceed 481.20 acre-feet.

The total combined duty of water under Permits 73553, 74517, 75294 and 75295, having a comingled place of use, shall not exceed 560.3 acre-feet.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

(Continued on Page 2)

Any dedication of water from this permit for a residential subdivision shall be allocated at 0.88 acre-feet per lot. The State Engineer may amend the per lot allocation based on evidence and data supporting such change.

The point of diversion and place of use is as described under items 5 and 7 respectively on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.113 cubic feet per second, but not to exceed 81.85 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

August 21, 2009

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

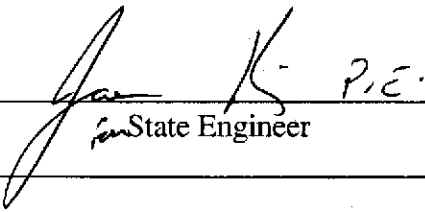

August 21, 2012

Map in support of proof of beneficial use shall be filed on or before:

15. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use. Applicant intends to dedicate water under this application to a public utility to serve 412 single family residential units plus related common uses. Additionally, Applicant is dedicating 8.96 acre-feet of water rights under this application (together with supplemental permits' applications) to the Nye County School District for "school use" that will likely be consistent with the current irrigation manner of use, e.g., irrigation of school fields. Accordingly, the applicant requests that an 8.96 acre-foot portion of this application not be reduced in the amount of its consumptive use because the school use will likely be consistent with the current irrigation manner of use.
